City Manager

STATUS REPORT

1. Sewer Foam Injection for Root Control

The Public Works Department has identified a Contract for sewer foam injection root control services with Baltimore City (Contract# B50005627) through Dukes Root Control, Inc., upon which we will be able to piggyback. The foam injection program has been very successful in controlling root growth inside City sewer lines and helping to prevent sewer backups. This year we have budgeted $70,000 for this program. We will sign a Contract and issue a Purchase Order to Dukes Root Control, Inc. in the amount of $70,000.00.

As provided in Section 62 of the City Charter, this will serve as the required seven (7) day notice of intent to purchase.
